

# **Industrial and Business Statistics in Europe**

Grigore ALBEANU

Spiru Haret University, Department of Mathematics and Computer Science

**Abstract.** In the framework of the International Year of Statistics, many organizations over the world emphasize the utility of statistics (both from scientifically and professionally point of views) in society. This presentation reviews the participation of various organizations from Europe countries during the first semester of 2013. A complete report will be available in January 2014.

During presentation, the most important fields of industrial and business statistics are considered. European Network Business and Industrial Statistics organization, groups, and the ENBIS conference are covered and an invitation for registration with ENBIS is addressed.

**Keywords:** *International Year of Statistics, research and education in statistics, European organizations and Events*
